

Printing to PowerRIP 2000 using Claris Works

Using Server/Standalone Macintosh, OS 8.6 or later

Note: - The following directions are for LaserWriter 8.7 and AdobePS 8.7.

- Desktop Print Monitor and Desktop Print Spooler must be active in the Extension Manager.

This document assumes that PowerRIP 2000 has been launched and Open Printer has occurred. It also assumes that a Claris Works file is on the Macintosh screen and is ready to be processed and printed.

LaserWriter 8.7

Step 1:

Chooser

In the Chooser highlight **LaserWriter 8.7**.
Highlight your printer.
Click **Create**.

Note: The first time you select the PPD it will say *Create*. All future selections in the Chooser will say *Setup*.

Click **Select PPD**.
Highlight the appropriate PPD for your printer and click **Choose**.
Close the Chooser
A Desktop Printer will be created.

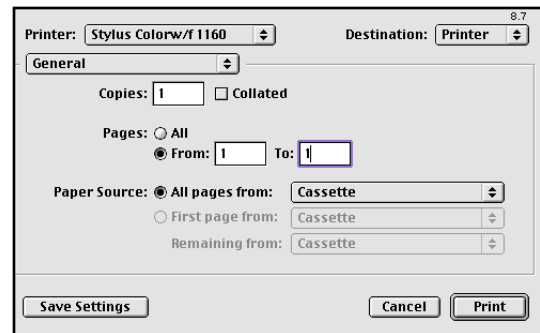

Step 2:

Go to **File>Print**.

The LaserWriter 8.7 Print dialog will display.

General

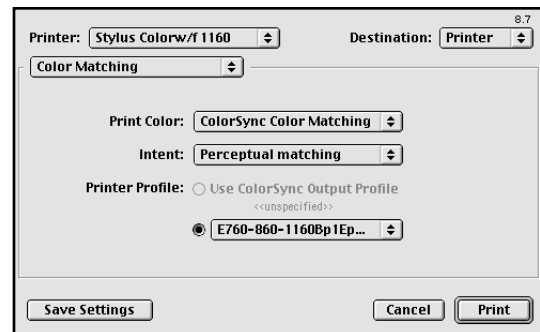

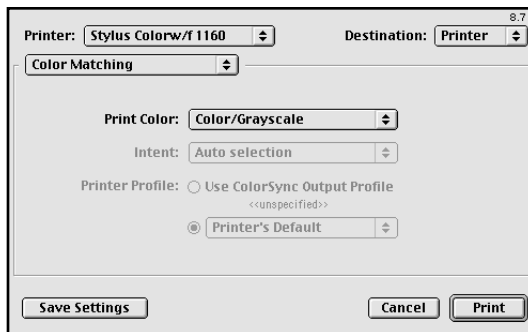

Define the pages you want to print in To and From.

Step 3: Color Matching

If not using ICC Profiles select **Color/Grayscale**

If using ICC Profiles select **ColorSync Color Matching** in Print Color.
Select **Perceptual Matching** in Intent.
Select the **ICC Profile** you want to use.

Note: For an in-depth discussion of ColorSync and ICC Profiles please read the *ColorSync ICC Read Me*.

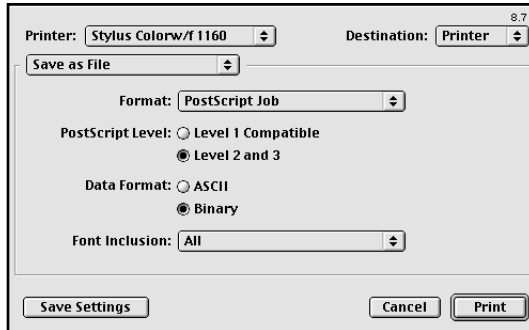

Printing to PowerRIP 2000 using Claris Works

Using Server/Standalone Macintosh, OS 8.6 or later (Cont)

Step 4:

Save As File

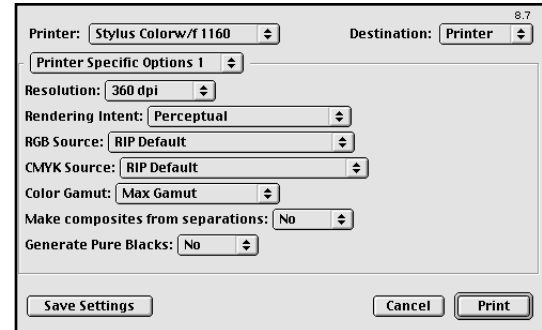

Select **Level 2 and 3** in PostScript Level.
Select **Binary** in Data Format.
Select **All** in Font Inclusion.

Step 5:

Printer Specific Options 1

For an in-depth discussion of the Printer Specific Options for your printer see Appendix 4 of the PowerRIP 2000 manual.

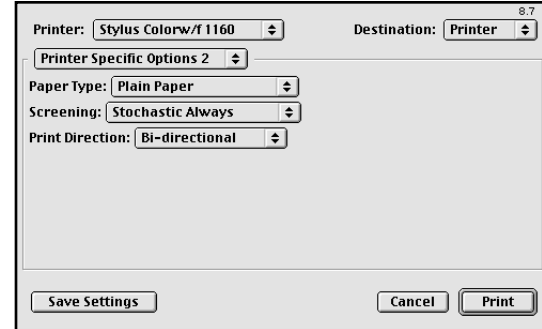

Step 6:

Printer Specific Options 2

Select the appropriate **Paper Type**.
Select **Stochastic Always** in Screening.
Select **Bi-Directional** in Print Direction.

Click **Save Settings**.
Click **Print**.
The file will process and print.

AdobePS 8.7

Step 1:

Chooser

In the Chooser highlight **AdobePS 8.7**.
Highlight your printer. Click **Create**.

Note: The first time you select the PPD it will say *Create*. All future selections in the Chooser will say *Setup*.

Click **Select PPD**. Highlight the appropriate PPD for your printer and click **Select**.

Close the Chooser.
A Desktop Printer will be created.

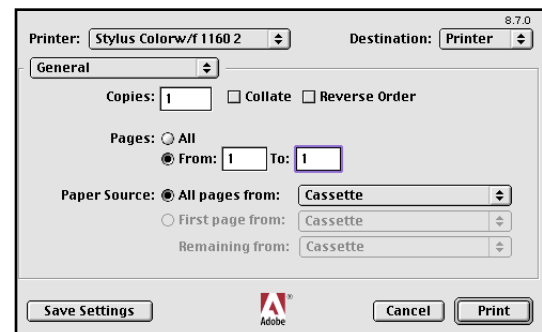

Step 2:

Go to **File>Print**.

The AdobePS 8.7 Page Setup dialog will display.

General

Define the pages you want to print in To and From.
