

Printing to PowerRIP 2000 from Illustrator 8.x using Win 95/98

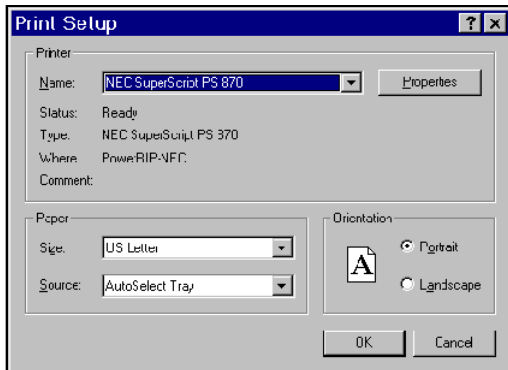

Note: It is assumed that an Illustrator file is on the screen and ready to be printed.

Step 1:

File>Print Setup

The Print Setup dialog will display.

Select your **printer** in the Name pulldown.
Select the appropriate **paper size** in the Size pull down.

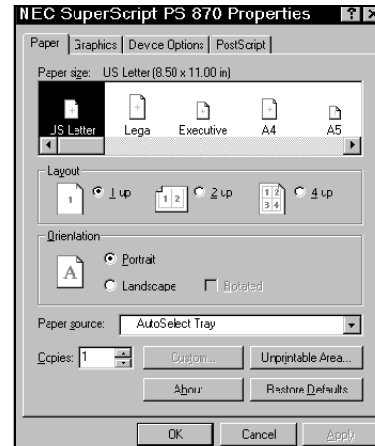

Step 2:

Click **Properties** in the top right corner of the dialog.

Page Setup tab

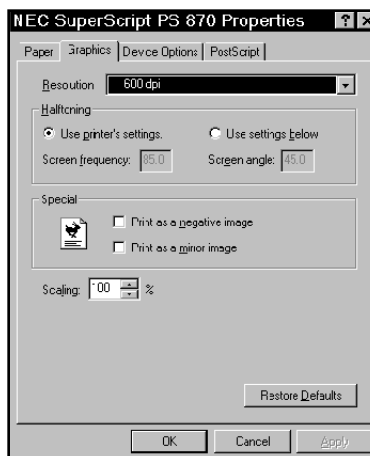

Select the appropriate **Paper Size**.

Step 3:

Graphic tab

Select the appropriate **Resolution**.

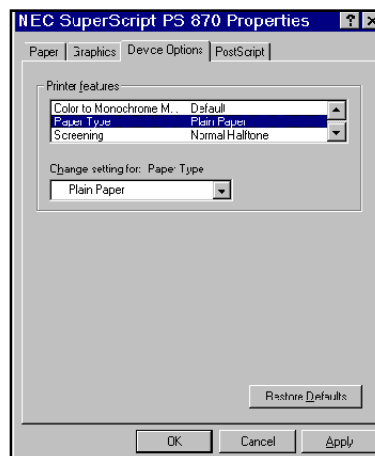

Step 4:

Device Options tab

Select the features appropriate for your needs.
The Printer Features include: Separations, Color to Monochrome Mapping, Paper Type, and Screening.

Click **OK**.

Click **OK**.

Printing to PowerRIP 2000 from Illustrator 8.x using Win 95/98 (Cont)

*Note: If you are going to print separations do step 6 and 7.
If you are printing a composite do step 5 only.*

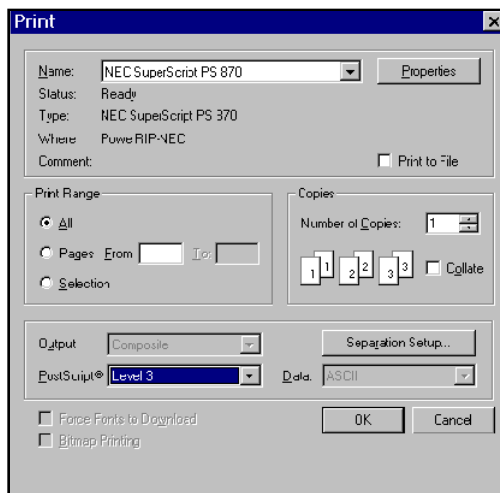

Step 5:

File>Print

The Print dialog will display.
Click **OK**.

If this is the first file you are sending, PowerRIP 2000 will automatically launch, process, and print.

Auto launch will only happen if you have installed PowerRIP 2000 on your c:\ drive. If it is installed on any other drive, you will have to manually launch. To manually launch go to **Start>Programs>NEC SuperScript PowerRIP >NEC SuperScript PowerRIP**.

Step 6:

In the Print dialog click **Separation Setup** in the bottom right corner.

The Separation dialog will display.

Click **Open PPD**.

The Open dialog will display. Navigate to your PPD folder **c:\PRPC2000NEC>PPD>US** and select the PPD for your printer.

Click **Open**.

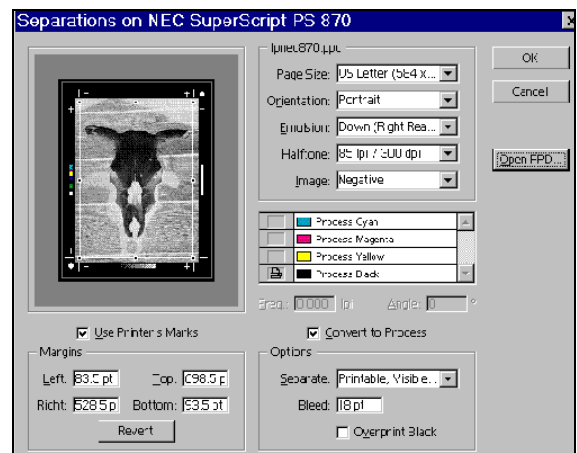

Step 7:

The Separation dialog will redisplay and be active.

Make sure your Page Size, Orientation etc., is correct.

Click **OK**.

Click **OK**.

PowerRIP 2000 will automatically launch if installed on the c:\ drive, process, and print.
